Professional MW Scale Solar PV Power Plant Design

Online & Offline Training

- # On Grid PV Power Plant
- # Hybrid Grid PV Power Plant
- # Off Grid PV Power Plant
- # Micro Grid System
- # DC Pumping System

TRAINER DETAILS

Engr. Sheikh Rafat Bin Ali

CEO, Chairman & Founder (Ulterior Engineering)
Former Project Manager, Tasisat International, KSA
Former Project Manager, Samasun International, KSA
Solar PV Engineer (KSA Govt. Certified)
Ex System Technical Engineer, Delta Control, KSA
Delta Automation Engineer (Delta Group, George University, Certified)

Engr. Asif Mahmud

Sr. Service Engineer
B.Sc. in EEE, SUB

ACHIEVEMENTS:

- Get International Standard ISO 21001: 2018 EOMS Approve Certificate.
- Lecture Sheet
- Video Class In Google Classroom
- Lifetime Membership
- Industrial Project Support
- Job Opportunity, Internship Opportunity, Research Work, Scientific Publication Guidelines

WHY THIS COURSE:

- Future world will be depended on sustainable renewable energy and solar PV system is one of them where this solar industry is enhancing whole around the world.
- If anyone wants to become a professional solar PV system design engineer and intended to work in solar power plant installation, designing, consultancy and management.
- If anyone wants to do business related to solar industries.
- To know practically all the technical terms and issues about solar PV system engineering.
- Those who want to do research in solar power system management and installation techniques

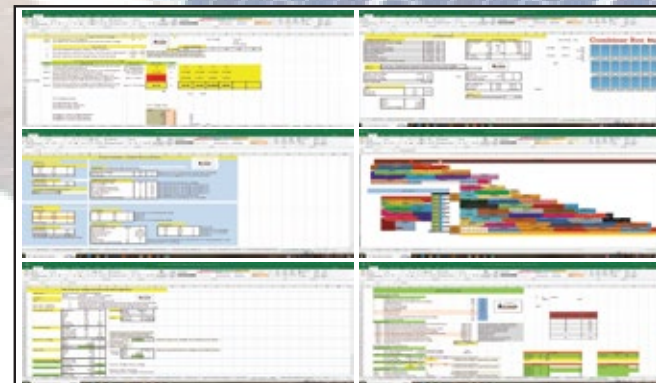

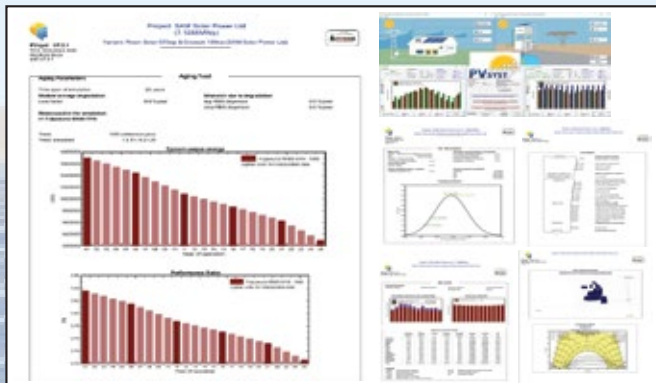

By End of This Training You Will be Able To Design:

1. On Grid PV Power Plant
2. Off Grid PV Power Plant
3. Hybrid Grid PV Power Plant
4. Micro Grid System
5. Dc Pumping System

Small Scale/Medium Scale/Large Scale Project

SOFTWARE

Course Outline

OVERVIEW OF SOLAR PV SYSTEM(PART-1)

- Introduction of solar PV system
- Solar cell, solar panel, solar string, solar array
- Different Solar module connection configuration
- Types of solar panel, Solar PV system, Inverter.
- Overview of main components of the system
- Types of structure
- O/P of solar PV system
- What affects electricity output
- Getting the most electricity from a panel
- Thermal generation (CSP) & Photovoltaic (CPV)

Solar Panel

solar Array

POSTMORTEM OF SOLAR CELLS (PART-2)

- Postmortem of Solar Cells (PART-2)
- Solar radiation, GHI, GII, GEI
- Hot spot effect
- Half-cell, multi-busber cell
- 100% efficient solar panel & Cell
- Solar cell datasheet & Smaller cell vs bigger cells
- Fill factor
- Solar cell multi-busber & cutting and reconnecting
- Make the solar panel by cell
- Compare between Panel efficiency & cell efficiency

Panel Efficiency

Multi-Busber

POSTMORTEM SOLAR PANEL(PART-3)

- Different Solar panel datasheet overview
- Mono , Mono Perc & Mono Bifacial silicon solar panels
- STC ,NOCT,PTC &CEC panel power output,Voltage,Amp perm2
- High temperature & low temperature impact on solar cell, panel and system
- Calculate minimum voltage of solar panel and system
- Calculate maximum voltage of solar panel and system
- Calculate NEC maximum voltage of solar panel and system
- Temp rating of solar panel
- Temp coefficient of different types of solar panel
- Mono vs Mono ,Poly vs Poly & Mono vs Poly high temp performance
- The min and max number of panels in the string and array
- Max current and max series fuse rating maximum system sizing
- Factors that change performance of PV.

Bifacial silicon solar panels

Mono Perc

SOLAR PV DESIGN BY EXCEL SHEET(PART-4)

- Calculate Solar panel efficiency power and size
- Calculate Solar panels min. Voltage , max. Voltage & nec table calculation
- Calculate Solar panels series, parallel & mixed connections
- Calculate Solar array max. Voltage calculations
- Calculate From String & array to combiner box
- Calculate Battery introduction
- Calculate Battery temp compensation introduction
- Calculate Battery temp and charger controller numbers speaking part 1
- Calculate Batteries connections - series and parallel
- Calculate Battery bank sizing
- Calculate Inverter sizing

Battery Bank Sizing

Inverter Sizing

Course Outline

PROJECT PLANNING(PART-5)

- Step 1: engineering site visit
- Step 2: permits and documents
- Step 3: ordering equipment
- Step 4: civil work
- Step 5: structure
- Step 6: panel installation
- Step 7: electrical work
- Step 8: testing and commissioning
- Step 9: project report submission

Panel Installation

Testing

OVERVIEW YOUR LOCATION.(PART-6)

- Latitude, longitude & Coordinates' position indicators
- Time zone & Time difference between two locations
- Latitude and seasonal changes
- Understand of sun path chart
- Magnetic & true azimuth
- Understand of Solar panel optimum orientation
- Solar irradiance & power production in Different hemisphere
- Adjustable tilt angle setting & Fixed tilt setting- solar irradiance & power production

Tilt Angle

Solar Irradiance

THE SHADOW - THREE DIFFERENT SOURCES (PART-7)

- Shadow length in summer solstice & winter solstice
- Shadow length on equinoxes
- Solar panel shadow at any tilt ,location & time

Shadow Analysis Define IRSD And Pitch

SOLAR PV DESIGN BY SKETCHUP SOFTWARE (3D ANIMATION) (PART-8)

- Number of project design by sketchup software
- Shadow analysis
- Pvwatt,pvgis report
- 3D animation making with video
- Solar project by skelion

Project Design by Sketchup Software

PVSYST WITH SKETCHUP(PART-9)

- Mega watt project on grid system pvsyst design step by step
- One complete sketchup design for solar system step by step
- Number of examples of solar project design by pvsyst with Sketchup

Course Outline

PROTECTIVE DEVICE & CABLE SIZING (PART-10)

- Solar cable and sizing
- Protection system and sizing

Solar cable

1-100 MW SOLAR PV PROJECT DESIGN BY PVSYST SOFTWARE(PART-11)

- A complete walkthrough of the pvsyst software
- Define site characteristics including location and weather data
- The science, mathematics & art behind solar pv system design
- The complete understating of a client's requirements to prepare a pvsyst design
- Performing a virtual and in-person site assessment
- Learn to calculate all input values such as azimuth, tilt, losses, etc.
- Analyze the output
- Gain an overview of the system losses, and how they impact the simulation of the pv system.
- Detailed knowledge of losses, 3d modeling and near shading analysis
- Analysing a pvsyst report and creating a professional sales proposal
- Being able to independently perform grid-connected pvsyst simulations of up to 10 mw
- Perform p50 – p90 estimations for a pv system.
- Perform economic and greenhouse gas abatement analysis on a pv system.

Solar Pv Project Design By
Pvsyst Software

PVSYST & HELIOSCOPE & PVSOL REPORT ANALYSIS(PART 12)

- Mega watt project Advance Report Analysis
- Compare between Pvsyst, Helioscope,& Pvsol report.
- Data analysis & Research

Report Analysis

BENIFITIES

- Lifetime Course Access
- Unlimited learning
- Future Updates Included
- Google Classroom Access
- Comprehensive Video Access
- Centralized Learning Hub
- Future Updates Included
- Offline and online Training Access
- Hybrid Learning Experience
- Branch flexibility & LAb Access
- Complimentary Software Access
- Dhaka, Gazipur & CTG All Branch Access
- Lifetime Lab Access
- Exclusive Lifelong Privileges
- Job Opportunity In HOME and ABROAD lifetime Support In Professional Sector

3d Design

Life Time Membership Facilities

Life Time Course Access

Lifetime Access:

Enroll once, enjoy perpetual access to your selected technical course.

Unlimited Learning:

Dive into limitless opportunities, refining your skills at your own pace.

Future Updates Included:

Stay current with seamless integration of all upcoming course updates

Certificate

Get International Standard ISO 21001 Approve Certificate.

Google Classroom Access

Comprehensive Video Access:

Attend offline classes and receive full video versions for convenient revision at home. Missed a class? No worries – catch up with the recorded video sessions anytime.

Centralized Learning Hub:

Gain access to Google Classroom, your one-stop hub for technical articles, research files, project materials, and more. Enjoy a wealth of resources, including paid software, class materials, lecture slides, and concise notes, all organized for easy retrieval.

Future Updates Included:

Elevate your learning experience with our integrated Google Classroom access.

OFFLINE and ONLINE Training Access

Hybrid Learning Experience

Enjoy the flexibility of dual learning paths, combining the richness of in-person training with the enduring convenience of online assistance.

Unlimited Learning:

Dive into limitless opportunities, refining your skills at your own pace.

Branch Flexibility

Enjoy the great training experience in all branch **Dhaka, Gazipur and Chattogram** with your membership card allow you to seamlessly participate in training and lab activities throught your lifetime.

Backup Class Support

Missed a Training Session ? Need the practical session again ? No problem.

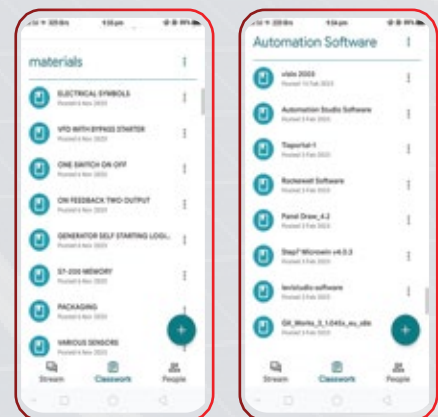

Benefit from regular backup classes, ensuring you never fall behind in your learning journey. Stay on track with our dedicated backup class support, providing you the opportunity to catch up on any missed sessions and maintain your learning momentum.

Complimentary Software Access

Unlock all essential paid software crucial to our field.

As a member, enjoy exclusive access to a suite of valuable tools and resources at no extra cost.

Job Recommendations

As a valued trainee, enjoy ongoing job recommendations from us. We're committed to helping you find great career opportunities.

Lab Using Access

Lifetime Lab Access:

Practice endlessly at our cutting-edge labs in Dhaka and Chattogram to master automation skills for life.

Unlimited Practice:

Hone your automation expertise with lifelong access to our state-of-the-art labs.

Exclusive Lifelong Privileges:

Elevate your automation career with continuous access to our labs in Chattogram, Dhaka and Gazipur."

Post-training, benefit from continuous assistance for any work-related challenges you encounter. Receive guidance not only in professional roles but also in research projects, undergraduate studies, and postgraduate research endeavors. Our commitment goes beyond training, ensuring a well-rounded support system for your continuous growth and success.

1. Enduring Professional Support
2. Comprehensive Career Assistance
3. Navigate through research work with our expert guidance.

UE Smart Factory Lab

Our Most Valuable Program

MISSION-121

100% Job Replacement Oriented Program

*Note: Visit Our Office To Get More Information About This

1

Automation Pro
Chapter -1

2

Automation Pro
Chapter - 2 (SCADA)

3

Power System Design
With SCADA

4

Embedded System Engineering
Robotics/Chip Designing (FPGA)

5

BMS Automation

6

HVAC System

7

Electrical Design
with AutoCAD

8

Electrical Fire & Safety

9

Industrial IOT

**Industrial attachment for Diploma students, Polytechnic and University
Professional training is covered with industrial projects and factory visits.**
